

# Nothingface, Ether

I'll never hesitate  
because i'm to go for this  
I'll never show restraint  
because theres no need for that  
I know everyone  
I've been everywhere  
I know everything, because i'm everybody  
We came to take control  
We came to sell you freedom  
We came to burn you down  
We came to brainwash children  
(Chorus)  
And it's not our fault  
It's just your own new suicide  
Where we belong  
Theres no one to hurt  
It's some place where we can't be found  
Where we belong  
It's darker than space a feeling that we all pushed down,  
it can't be found  
It's that time again  
Can we get it right  
He wants us to revolt to set the world on fire  
We won't show restraint because we like the violence  
We are security rapped in our brutality  
(Chorus)  
Find away through space  
We'll never be found by anyone down here  
Away from everything that knows what we did  
I know everyone  
I've been evrywhere  
I know everything because i'm everybody  
(Chorus) x2
