

# Nylon Beat, Black Rain

It must have been July  
When I met you  
On a gentle August night  
You kissed me too

Before the fall I was so sure you're my own  
September I was all alone

Like black rain from the clear blue sky falling on me  
You left me without saying goodbye alone as can be  
Like black rain on a summer night falling on me  
You took away my love and light but I still believe

Next March I've got your note  
You said: some day  
That letter gave me hope  
All through May

And when the summer came I waited in vain  
It was a lonely June again

Like black rain from the clear blue sky falling on me  
You left me without saying goodbye alone as can be  
Like black rain on a summer night falling on me  
You took away my love and light but I still believe

Like black rain from the clear blue sky falling on me  
You left me without saying goodbye alone as can be  
Like black rain on a summer night falling on me  
You took away my love and light but I still believe

Like black rain from the clear blue sky falling on me
