Oasis, Waiting For The Rapture

I still don't know what I was waiting for A big love to fall down from the sky She took my hand and picked me up off the floor She put an apple in my eye

I said I'm tired Come get me off the merry-go-round I'm wired Come feed me and then bring me down

She come up to me I can't remember what she said Cause I was in a trance and I forgot it all Banging on about all that Revolution in her head She make a lover seem so magical

She said I'm tired Come get me off the merry-go-round I'm wired Well heaven must of sent you To save me from the rapture... yeah

I'm tired
Come get me off the merry-go-round
I'm wired
Come feed me and then bring me down
