Obituary, Solid State

Live for the cause pain dies for
Deems real the shadows of the door
Set falls thru the halls of time
There dwells landfill's crime

You ask how?
Solid State!

Kill for the need sick lost time
Pidgeons falling to ground
Bury graves fill beyond lies
Deep bruise falling to die

You ask how?
Solid State!

Rot around pray their coming for you
The one to die predecessor
Taking the souls and trade what we want
The fabric of life we dont know deciding

Go to the place of sacrifice
With the jewels preventing access
Above with land kills battery
Encircle the weak preparing the souls of life

Rot around pray their coming for you
The one to die predecessor
Taking the souls and trade what we want
This fabric of life we take your blood
Or please take your blight and pain!

You ask how?
Solid State!

Live for the pain cause dies for
Deems real the shadows of the door
Set falls thru the halls of time
There dwells landfill's crime

You ask how?
Solid State!

Live for the cause pain dies for
Deems real the shadows of the door...

Solid State!
