

October Project, Eyes Of Mercy

Hush, close your eyes
And I'll keep you safe
Allow you to weep
And sing you to sleep

Don't be afraid
Remember I'm here
The noise in the street will soon disappear

When the soft face of mercy
Is lost behind a veil
I will stay with eyes open
Stay here with eyes open
To watch over you
And take away the sadness and the fear

Hide in my arms
And dream golden dreams
Forgetting the world
Of men and machines

When the soft eyes of mercy
Are blinded by the dark
I will stay with eyes open
Stay here with eyes open
To watch over you
And take away the sadness and the fear

I'll be here
