Of Montreal, Friends Of Mine

When we're all in a crowd And you catch her eye And then you both smile I feel so good inside And when I'm with her She talks about you The things that you say The things that you do

It feels so good to know two people So in love So in love

They are friends of mine They are friends of mine And they've got something It's so hard to find They are friends of mine They are friends of mine And they've got something You don't often find

She takes your hand When the world stays outside That's something to see That's nothing to hide

And when I feel bad When people disappoint me That's when I need you two To help me believe

It feels so good to know two people So in love So in love

They are friends of mine They are friends of mine And they've got something It's so hard to find They are friends of mine They are friends of mine And they've got something You don't often find

It feels so good to know two people So in love So in love

They are friends of mine They are friends of mine And they've got something It's so hard to find They are friends of mine They are friends of mine And they've got something You don't often find
