

Olivia Newton-John, Love And Let Live

(Alan O'Day)

Two lovers watch the news
They've got more than love to lose
As they lay there under cover
Do they really know each other

There's a whisper in the air
Don't you feel a little scared
The stakes are too high
Some have even lost a friend
And we're nowhere near the end
It doesn't help to moralize

The search is not the same now
It's more than just a game now
Love and let live
It can thrill you --fulfil you
But lately it can kill you
Love and let live
A little information's
Not too much to give
We've got to tell lovers
How to love and let live

Do you think it over twice
At the edge of paradise
If you're not really sure
Use an ounce of prevention
'Cause there's still no cure

So you smile and say to me
It's not my responsibility
You better change your attitude
Did you ask your lover who
Who was there ahead of you
You need to know the truth

The search is not the same now
It's more than just a game now
Love and let live
It can thrill you --fulfil you
But lately it can kill you
Love and let live
A little information's
Not too much to give
We've got to tell lovers
How to love and let live

I have found the one for me
We share our love exclusively
But we're all affected
'Cause we're all connected
We're a family

Love and let live
A little information's
Not too much to give
We've got to tell lovers
Love and let live
