Olly Murs, Years & Years

When I'm alone, in the dark And paint a picture inside my mind Of other things that I want But I never thought I would find And it blows my mind Because there you are by my side Maybe you know, maybe you don't But it's a question I have to ask I know we're young, and we've got life But life always goes so fast But while you're mine Yes, it feels like time's on our side

Years and years, forever young Years and years, yet to come I take every second of every minute Long as you're in it, You know I'm with it! Years and years we won't forget The time and place that we met And now I remember we're all so clear You signed your name on my heart Saying you were here

No we're not at the end But we're close maybe once or twice We got burned but we learned not to listen to bad advice Now, I know you're mine Cause it feels like time's on our side

Years and years, forever young Years and years, yet to come I take every second of every minute Long as you're in it, You know I'm with it! Years and years we won't forget The time and place that we met And now I remember we're all so clear You signed your name on my heart Saying you were here

It doesn't matter where we go It's all I want, it's all I know This feelings never ever getting old Cause all I know, know,

Years and years, forever young Years and years, yet to come I take every second of every minute Long as you're in it, You know I'm with it! Years and years we won't forget The time and place that we met And now I remember we're all so clear You signed your name on my heart Saying you were here

You signed your name on my heart Saying you were here
