## Omd, Watch Us Fall

We've got to get a message to the stars above Like radios in heaven hearing just enough And every single tear drop along the way We put them in our pockets for a rainy day But here we are in truoble Like we always are Just praying for a mriacle And reaching for stars We love you Would die for you We need you Every day We got to get a message to the promised land Like semaphores in motion so they'll understand But every single vision that we saw today We didn't quite believe it in the usual way Yet here we are in heaven Who could what for more We always end up getting what we're asking for We love you Would die for you We need you Every day It's just another promise like we've heard before We're never really knowing what we're fighting for We love you Would die for you We need you Every day We love you Wouldn't leave you We miss you Far away We love you Would die for you We need you Every day We miss you Far away We love you Would die for you We need you Every day
