

# One Fine Day, Goodbye Reality

when your daily job is living your nightmares  
when you work your ass off and no one even cares  
I know a place to go  
when you work your ass off and no one even cares

say goodbye to reality  
forget about pain and all of your sorrow  
welcome my friend insanity  
take my hand we go over the rainbow  
some people do it and others want it  
and everybody needs it a little hideaway

when heaven turns into hell in disguise  
when all your future plans are not your size  
when your daily job is living your nightmares  
and if you follow me then you will see

say goodbye to reality  
forget about pain and all of your sorrow  
welcome my friend insanity  
take my hand we go over the rainbow  
some people do it and others want it  
and everybody needs it a little hideaway
