

One Man Army And The Undead Quartet, The Sun

Can you hear it? The silence beyond the trees and hills
Deeper than ever the forest hides that praying and that useless moaning
Still she puts her faith in god that eventually will freeze her blood

Yeah, there's a place in my head when the sun never shines
It's cold and it's dark and it's feeding on me
Then say when you die you see a light
But that is not true cause in hell everything is black

Can you see it? The carrier of the devils tool
Stabbing that plague, that virus that breaks down the wings of an angel
A child, a daughter of cruelty is found dead in the snow

Yeah, there's a place in me head when the sun never shines
It's cold and it's dark and it's feeding on me
Then say when you die you see a light
But that is not true cause in hell everything is black

The sun never shines on me

My child is sick, she needs to be taken care of now
My mind is telling me that satan lives in her
Beating her every day, still need to beat some more
I medicate her as she stares at me with broken vision

Then say when you die you see a light
But that is not true cause in hell everything is black
