

One More Time, Turn Out The Light

Here we are sitting so close yet you're turning away
Wishing that you could avoid what you're now gonna say
Outside the city is burning with life
Inside it's cold, am I dead or alive
I don't wanna hear anyone just hold me, hold me and
Turn Out The Light
Leave all senses behind once more
Just Turn Out The Light
And love me like you used to love me before
And don't say our love has become just a chore
So Turn Out The Light
Who needs the light
I've heard that silence is golden it's not always so
'Coz we have not had it out with each other at all
Scared of dissent we laid words on the shelf
Hoping a change soon would come by itself
Oh, how could we be so naive
Just losing the true thing
Turn out the light... a.s.o.
Truth can be scary, oh how will I get through this blues
Closing my eyes but I must realise that it's true
When you say it's too late for us
Outside the city is burning with life
Inside it's cold, am I dead or alive
I don't want to hear anyone just hold me, hold me and
Turn out the light... a.s.o.
