

# One Ok Rock, Reflection

Fading out your memories from the vision  
Pulling off the picture away from mirror  
Still you wait for the chance  
For me to share our time we had  
But what will be for you  
I know same results will break us down  
Help me out, inside of me  
Just take on to find your way  
All you want is to stay along  
But we stand too far  
Falling out pieces you'll never find one  
I know what you are looking for  
Trying to find a reason you can pull me over  
You just listen what they say  
Creeping shadow right behind me  
You know I'll turn my head away  
I will never let you down  
You know what I feel  
Help me out, inside of me  
Just take on to find your way  
All you want is to stay along  
But we stand too far  
It's like a reflection, like a reflection  
In my heart, just keep on bleeding  
I can't stand myself too long  
Like a reflection, it's like a reflection  
Don't you ever say your words  
We had enough, we can take it over  
It's like a reflection, like a reflection  
In my heart, just keep on bleeding  
I can't stand myself too long  
Like a reflection, it's like a reflection  
In my heart, just keep on bleeding  
I can't stand myself too long  
Like a reflection, it's like a reflection  
Don't you ever say your words  
We had enough, we can take it over
