

# One Way System, Into The Fires

You wear the mask hide your face  
To pave the way for another race  
See the way, see your destiny  
Your mercy screams won't set you free

Into the fires  
Into the fires of truth and fear  
Into the fires  
Into the fires the day is near

The primitive days coming close  
You natural instincts set close  
Sense apprehension in the air  
The fires burn, they glow and flare

As tomorrow dawns you realise  
There's no one to help  
No one survives  
In this desert cries ring out  
Destroy the fire you hear them shout
