

# Orange Blue, Here And Now

How many times we say I'm with you  
But too many times we're far away  
Don't we have  
Too many goals we have to reach for  
Instead of seeing where we stand in this life

So many thoughts that have been wasted  
On the future of today  
So why not live right now and face it?  
Then your day will never fade away

We've got eyes but we don't see  
We've got ears that don't hear  
Is there anybody with me?  
Is there anybody with me yea?  
We've got hands that long to reach for  
We've got lips that long to kiss  
We're heading for tomorrow  
But life is here and now

I embrace your truthful picture  
Feel you close here by my side  
But if you ever should go someplace else  
I'll be with you through the faces of time

We've got eyes but we don't see  
We've got ears that don't hear  
Is there anybody with me?  
Is there anybody with me?  
We've got hands that long to reach for  
We've got lips that long to kiss  
We're heading for tomorrow  
But life is here and now  
And now

What are we going to do?  
When dreams become true  
And what if we have to deal  
With what is real  
So lend me your time  
Yet I'm going to give it back to you  
To you

We've got eyes but we don't see  
We've got ears that don't hear  
Is there anybody with me?  
Is there anybody with me?  
We've got hands that long to reach for  
We've got lips that long to kiss  
We're heading for tomorrow  
But life is here and now  
We've got eyes but we don't see  
We've got ears that don't hear  
Is there anybody with me?  
Is there anybody with me?  
We've got hands that long to reach for  
We've got lips that long to kiss  
We're heading for tomorrow  
But life is here and now
