

Our Last Night, Karma (feat. Masked Wolf x Sam)

Psycho

The paranoia sets in under my skin

Got me so low

Tryna drink me to death 'cause you're lyin' again

All of my friends think I'm sick in the head

No, I can't let you go 'cause I know we should end it

Psycho

But that's what you like though

Sometimes I feel like you like bein' alone

And sometimes I feel like you won't let me go

Sometimes I feel like it's killin' me slowly

You love all the drama, now karma's comin' back for you

(Now karma's comin' back for you)

No strings attached, they already snapped

Girl I ain't frontin', I don't need you back

Had me on my kneecaps

Prayin' to God, nah, I don't even need that

Cruisin', goin' sixty, glad that you ain't with me

Houston had a problem, now I'm leavin' it to Whitney

Closin' up the bottle, free the liver and the kidney

Hopin' that tomorrow that the pain don't hit me, I

Sometimes I feel like you like bein' alone

And sometimes I feel like you won't let me go

Sometimes I feel like it's killin' me slowly

You love all the drama, now karma's comin' back for you

Now karma's comin' back for you

Now karma's comin' back for you

My backbone was broken, bullets in, reloadin'

Karma had you chosen, I'm still lost in the moment

Distilled days when I'm [?] and I'm really not copin'

Limp Bizkit with it 'cause this man keeps on rollin'

Now I see the numbers, I been playin' with the code

She was blowin' me for another, I was blowin' [?] nose

Used to the dark, now I'm adjustin' to the cold

Real estate in your heart 'cause you keep selling your soul

Man, this shit don't never change

How this go to red weddin' from a weddin' ring?

How this go from love to now? All I feel is pain

Now you know I've had enough, come and do your thing

Sittin' on the sidelines, I don't wish you well

You turned me to a psycho, you made me go to hell

I still hear the whispers, I know you'd never tell

And life is never fair, but this my farewell, like

You made me psycho

You made me, you made me

You made me psycho

Psycho, psycho, psycho

You made me, you made me

You made me psycho

You made me psycho

(You made me, you made me)

You made me psycho
