

Over It, Crush

If you build a better mousetrap
Won't the world come knocking down your door
Just to call it progress to make you sigh?
Nobody always cries

'cause it weirds me out
To hear the angels call
All the way from their coast
When their siren sound is the only hook

Let it ring to see if it can fit the key to all my dreams
Now it's time to face my choice, let there be no mistake
Let it ring, 'cause I've landed on this rock with all my friends
And we'll fight to- fight to make our peace with life
And take up our arms like sitcom soldiers

Do what you've come to do, just let it ring
Just let it ring
You'll never fight to show your friends
To rip apart your favorite frequencies

Let it ring
Let it ring to see if can fit the key to all my dreams
Now it's time to face my choice, let there be no mistake
Let it ring, 'cause I've landed on this rock with all my friends
And we'll fight to- fight to make our peace with life

Let it ring to see if it can fit the key to all my dreams
Now it's time to make a choice, let there be no mistake
Let it ring to see
I've landed this spot with all my friends
And we'll fight to worry about next time, next time
And we'll fight to worry about next time, next time

We'll take up our arms and fight
Take up our arms and fight
Take up our arms and fight
Like soldiers
Take up our arms and fight till time leaves us alone
