

Overhead, In 100 Years

While every star lines up free
The odd man stands still
From where I lay down humble
And day we make, you & I keep breathin'
And start the end

If you ever see the face of your staring idol
Just sense the sky and carry on blind
But I just fear a lesson
You know what's new in a hundred years
I just fear a lesson
For every lie died unsaid

A strange love unseeing
From where we stand still
For any stunnin' signs
You & I keep livin' and start the end
