

# Pacifier / Shihad, You Again

I hope I never see you again  
I hope I never touch you again  
Sometimes I wonder, what's f\*\*ked in my heart  
Won't let your fingers tear us apart

It's all so simple, it's all over again  
A lack of talent is caving you in  
Sometimes I wonder what's f\*\*ked in your heart  
We're losing grip now, now we're falling apart

The speaker speaks but the words sound haunted  
So much it's falling out of your hands  
Could you ever tell?

And it's there for me, there to see  
And it's in full view  
Why did I waste my time on you?
