

Papa Roach, World Around You

Somebody falls in love, somebody breaks a heart
We never fell in love we only fell apart
I'm getting lonely, i need somebody to hold me
I thought i'd never miss her
She cut me out of her pictures
Take a look at the world around you
Can you see the desperation?
Take a look at the world around you
Can you see the life your living?
Somebody tells the truth, somebody lives a lie

I can see right through the story is in your eyes
I know what they're saying, there is no need for explaining
There will be nothing better than when i burn all your letters
We never fell in love we only fell apart
We only fell apart
So we pick up the pieces and put 'em together
We said this was gonna last forever
We never fell in love we only fell apart
Somebody falls in love, somebody breaks a heart
We never fell in love we only fell apart
