

# Paul Brandt, Didn't Even See The Dust

shot gun everybody getting for the long run  
don't know where we're going  
but the out come comes with a little bit of trust  
lets go following whatever where the wind blows  
flying with our hands out of the window  
we didn't even see the dust

see how far we get  
driving straight ahead  
getting lost  
didn't seem to matter much  
all we had was time  
and a yellow line  
looking back we didn't even see the dust

chorus: shot gun everybody getting for the long run  
don't know where we're going  
but the out come comes with a little bit of trust  
lets go following whatever where the wind blows  
flying with our hands out of the window  
we didn't even see the dust

ohhhh yeah  
didn't even see it

we had ups and downs  
we got spun around  
we held on when the going got a little tough  
it took love and faith  
and some give and take  
and grace  
no we didn't even see the dust

shot gun everybody getting for the

chorus: shot gun everybody getting for the long run  
don't know where we're going  
but the out come comes with a little bit of trust (ohhhhhh)  
lets go following whatever where the wind blows  
flying with our hands out of the window  
we didn't even see the dust

come on now!

lets go following whatever where the wind blows  
flying with our hands out of the window  
we didn't even see the dust
