

Peabo Bryson, Love Always Finds Way

We've said it all
A thousand times before
Been to the wall
And always found somewhere to turn
There was always more to learn
We've reached the end
And almost closed the door
And someone within
I never can remember who
All I know is that we've found
The strength to make it through

Love always finds a way
When the clouds have no silver lining
She comes thru shining
Love always sees the light
Through the darkest night
In a small way
Love always finds a way

Holding you near
After the storm has passed
It becomes clear
When all our tears have finally dried
That no matter how we fools
May try to turn the tide

And in this moments when the magic seems to fade
We must remember then that's the time to keep on
Believing and I'll be a friend

If we both trust
In what we really feel
The two of us
Can hold tomorrow in our hands
All it takes is just the faith to truly understand that...

Love always finds a way
When the clouds have no silver lining
She comes thru shining
Love always sees the light
Through the darkest night
In a small way
Love always finds a way
