

# Perrie, Forget About Us

I heard you fell in love with somebody new  
I know you heard that I've found someone too  
Saw you blew up and I'm proud of you  
But I don't want to hear those songs no more

Do you remember the way we fell and  
Like everything froze with just one glance then  
From heaven to nothing it feels like hell well  
Here's the truth of it

I don't want you ever to forget about us  
In the front seat listening to songs that made you think about me  
Bonfire smoke on your hoodie  
That I stole from your flat  
No I never gave it back but  
I don't want you ever to forget about us  
I know we were never perfect  
But I think about the life we never had  
Yeah we both found different love  
And we're moving on  
Let's leave it buried where it was

I've felt more love since you for sure  
And I don't want to go back to where we were before  
But when I hear your name it's still so raw  
Do you ever feel the same way too

Do you remember the way we fell and  
Like everything froze with just one glance then  
From heaven to nothing it feels like hell well  
Here's the truth of it

I don't want you ever to forget about us  
In the front seat listening to songs that made you think about me  
Bonfire smoke on your hoodie  
That I stole from your flat  
No I never gave it back but  
I don't want you ever to forget about us  
I know we were never perfect  
But I think about the life we never had  
Yeah we both found different love  
And we're moving on  
Let's leave it buried where it was
