

Pestilence, Out Of The Body

Music:Mameli

Lyrics:Foddis

In the darkness

They crawl on places

When you can't see or hear they come

Marching silently

When it's dawn they will be gone

A swelling on my body

Makes me suffer, live in anxiety

No time to waste

Just open the abscess, will you please help me

The ignorance is dominating

Remedies you try

I can not live this life any longer

What is it and why?

While you're asleep

They'll enter your skin

The search for the new place they will dwell

They give their children

A place to be born

You won't notice except for the smell

Mysteriousness, researches can't explain

The sorrow of this eternal pain

It's burning stronger day by day

Cure me, there must be a way

Desperation, confused mind

Never heard of the disease of this kind

So tell me what can I do

To leave this HELL I'm going through

Human blood

The perfect place

Birth of descendants

Creatures living

In my veins the horror

Frightening, sickening

The pain that I am bearing

Begging, please get them

Out of my body
