Peter Frampton, This Time Around

We'll be fine this time around Hold the line this time around All that stormy weather Get your soul together now There's blue sky all around

Once we gave into the night Got it wrong but that's alright There's a new day shining There's a silver lining now This time we both know how

(chorus)

Take the love that I bring
Take this song that I sing
Melody, harmony, You and me
We're gonna play it right this time around

No one breaks this time around Life just takes where we're bound Hear the music playing We know what it's saying know Lost until we're found And we're found this time around

(chorus)

Take the love that I bring
Take this song that I sing
Melody, harmony, you and me
You see dreams will come true this time around
Coz it's high time this time around

(sax solo)

In the dark on the way Dream the light 'till it stays Got it all here and now It's our time this time around
