

Phantom Planet, All Over Again

Your crash is waiting to happen
And you you're dragging me down

All over again
I give in I give up

You splashed but you started sinking
And you you're dragging me down

All over again
I give up
I give in
I give up

You are crowding me in I want to get out
This is the end all over again
You're crowding me in I just want to get out
This is the end all over again
