

Phantom Planet, Lonely Day

I could tell from the minute I woke up
It was going to be a lonely lonely
lonely lonely day.

Rise and shine rub the sleep out of my eyes
And try to tell myself I can't
go back to bed

It's gonna be a lonely lonely lonely lonely day.

Even though the sun is shining down on me and I should feel about as happy as can be
I just got here and I already want to leave

It's gonna be a lonely lonely lonely lonely day

Everybody knows that something's wrong

But nobody knows what's going on

We all sing the same old song

When you want it all to go away

It's shaping up to be a lonely day

I could tell from the minute I woke up it was going to be a lonely lonely lonely lonely day.
