

# Phantom Planet, Peace And Quiet

It was one day  
I was thinking of the future  
Going out of my mind  
When I think I left for a while  
Without thinking of consequence at all

Tried to tell myself  
We'd got lost in all the white noise  
But it was needless to say  
That it's no use  
No use at all  
There's no way out

Cause I have come down with the sickness  
And you just listen to the cure  
I just need some silence  
I think sometimes we all need peace and quiet now

We were taken by surprise  
And it messed with the confusion  
I was hit from all sides  
And it only started to get clear  
When I came to

I have come down with the sickness  
And you just listen to the cure  
I just need some silence  
I think sometimes we all need peace and quiet now

I have come down with the sickness  
You just listen to the cure  
I just need some silence  
I think sometimes we all need peace and quiet  
I think sometimes we all need peace and quiet  
Quiet, quiet now
