

Phantom Planet, You And I Vs The Sun

Well, we're sucked in a spot in the sky and it's got my attention
But it's something so small that it's almost an exciting adventure
Still I know that you said you and I should beware
And if it's under the light, then alright
If I know that it's there you and I should beware
And if it's up in our eyes then alright
I know if you're scared
Dark in our eyes
Baby, this golden light, put an end to the night
So, it's you and I versus the sun
Baby, this golden light, put an end to the light
So, it's you and I versus the sun
By the thought that has shaped and it's plan to escape
Still I know it was there
You and I should beware
If it's dark in our eyes, then alright
Yeah, it's you and I versus the sun....
Said, it's you and I versus the sun.....
