

Phideaux, One Star

One star is appearing in the blackest night
One star is now forming, innocent and bright
One star bring me comfort, when I'm sad of life

One star is exciting, it is borderline
One star cold and icy, primitive and wild
One star it destroys you if you look into the light
That's the star that I want when I'm out at night

But I know, yes I know, aye the burning light
But I know, yes I know:
Fear's a bitter ride

One star is exploding in the northern sky
That's the star above me, my iron satellite
One star it's inside me
It's the star I like

Feel the burning light
