

Phideaux, Universally

Now is the time I choose to go it is my time I know
For a voyage like a dream from the days spent you and me
Yes I have yes I heard yes I know you must go
Yes I love you yes I'll always be your friend through the grave
So I take you out to sea, ashes for the universe
Universally
Now you are free, where am I now?
Baby, a rain came tonight and it seemed you'd returned
Down the river's way
Baby I'm running from the room I get right inside the garden
Try to find you try to find you I wander to the ground
My soil it is you our garden stems from you
My soil you are true I garner strength to carry on from you
My soil my bloom from sea you flew
To mist from sky your kiss arrived
And so the awareness of you in the darkness gets me high
My heart in the darkness gets me through
