Phil Collins, That's What You Said

I remember the night you weren't at home (had to work late is what I heard) That's what you said I can never forget the way it felt, you needed some time to work it out, that's what you said and now I feel a fool. 'Cos late at night I call your name, I'm wondering what for, 'cos I've seen those other guys sniffin' around your door. Whatever happened to the words 'Lovers for all eternity?' That's what you said, I was your rome, you were my Juliet, eternally that's what you said and now I feel a fool. 'Cos late at night I hear your voice calling out my name, oh I know it's just a dream but every night's the same. I carried a torch for you, through the thick and thin you know it don't seem right that I won't see you again No no Late at night I call your name, I'm wondering what for, 'cos I keep seeing those other guys sniffin' around your door. I carried a torch for you through the wind and rain I'll never forget you, but I won't see you again No no I thought your friends all liked me I thought I fitted in just right, that's what you said. Soon I'll be gone and you'll be free, you can go find the things that you want. That's what you said and I won't feel a fool 'cos late at night I still call your name, I'm wondering what for, 'cos I keep seeing those other guys sniffin' around your door. What for?
