

Pinback, My Star

my star
this is daytime this is faultline
this is mainline this just might be (the) my star...

Elena? for now no more
look at the outside keep it down loss of information
web that's running out will search you
with a massive brain contusion

"what are you gonna name it"
"what"

(something about maybe allowing a black cat to give a massage)

"there's a new star what are you gonna name it"
"who cares? don't bother me"
