## Pink Martini, City Of Night

Well the sun's going down
With its deep amber light
Embracing the town as we fall into night
To the silvery sound as the birds fly away
Getting ready for love
Getting out of the day

It is the city of night It is the city if night Leave the worries of day behind And dream a new dream tonight

All the lands are a glow

All the lids painted red And you wish you could take That last thing you said Well the night is a drum Singing songs of delight But when dawn comes along Love is lost in the light

But in the city of night Oh, in the city of night Leave the troubles of day behind And dream a new dream tonight
