

# Pink, Turbulence

You and I  
Happy ending and a tragedy combined  
But we both can't live without it and we tried  
We should take our own advice

Don't give up  
There's a mountain in the middle of the road  
It'll take a little longer to get home  
Baby, all we've got is time

You can't help when your stomach sinks  
See your life happen in a flash  
In your head it could be so real  
That you almost feel the crash  
The panic is temporary  
But I'll be permanent  
So when it hits, don't forget  
As scary as it gets  
It's just turbulence

Close your eyes  
Pretend you're driving on an bumpy road at night  
You can meet me in the corners of your mind  
We can build a new cloud nine

If you're alive  
Then it means that you're committed to survive  
That's enough to drain the life from you sometimes  
But I hold on tight

You can't help when your stomach sinks  
See your life happen in a flash  
In your head it could be so real  
That you almost feel the crash  
The panic is temporary  
But I'll be permanent  
So when it hits, don't forget  
As scary as it gets  
It's just turbulence

Hold my hand, hold your breath  
And I'll find a place to land  
Where you're safe, never break  
Where the morning never ends  
When you say that you can't  
I will watch you dance through this turbulence  
It's turbulence

You can't help when your stomach sinks  
See your life happen in a flash  
In your head it could be so real  
That you almost feel the crash  
The panic is temporary  
But I'll be permanent  
So when it hits, don't forget  
As scary as it gets  
It's just turbulence  
It's turbulence  
It's just turbulence
