

# Placebo, Days Before You Came

Days before you came  
Freezing cold and empty  
Towns that change their name  
And a horn of plenty

Days before you came  
Counting breaths inside me  
Even crack cocaine  
Couldn't start to hide me  
Won't you join me now  
Baby's looking torn and frayed  
Join the masquerade  
Join the masquerade  
Won't you join me now  
Baby's looking to get laid  
Join the masquerade  
Join the masquerade

Days before you came  
It always seemed enticing  
to be naked and profane  
there is no denying  
Days before you came  
Thunderbolts and lightning  
Each day a brand new vein  
Each tourniquet colliding  
Didn't what you anyway [x4]

Won't you join me now  
Baby's looking torn and frayed  
Join the masquerade  
Join the masquerade  
Won't you join me now  
Baby's looking to get laid  
Join the masquerade  
Join the masquerade  
Days before you came [repeat]
