

Platinum Blonde, Lost In Space

One single solitary star
Is shining in the sky
Though we don't know just what they are
Don't pass us by

They are no ordinary men
They stand so high
They call this world the lion's den
Don't ask us why

We're lost in space
Will time remember me
We're lost in space
Will time remember, time remember me

Something's changed
There's something wrong
They're fighting in the sky
Just like a flash they'd come and gone
Time passed them by

Chorus

We're lost in space, will time remember me
