

PLAZA, Never Left My Mind

When I'm high enough
I can't feel her touch
I want you again
Baby

You still love me right?
You still need me right?
Through the darkest night
Tell me

Cuz it's you but you still seem afraid
Of this life that I can't put away
And I know that if ever I changed
You would be with me
Say you'd be with me

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind

When I feel your ghost
I turn away
But she sees the pain
Always

And she'll try to hold me
Try to understand
In ways only you can

But the truth
Is I guess I'm afraid
To just leave this life that I made
And I choose the attention and praise
But it cost me you
But it cost me you

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind

And all these songs that you have inspired
I've held your memories close but I'm tired

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind

Girl you never left my mind
Girl you never left my mind
Girl you never left my mind
