

# Podunk, Get It Off Your Chest

Can you feel it?  
All come down  
You work you way down to the bottom of a crowd  
It makes you wanna scream out loud  
And dive head first right off your cloud

And when you're by yourself  
And there is no one else  
You remember how it feels  
To get it all off your chest

Can you feel it?  
Coming down  
Your blood is pumping and you can't slow down  
It makes you wanna scream out loud  
And dive head first right off your cloud

And when you're by yourself  
And there is no one else  
You remember how it feels  
To get it all off your chest

Can you feel me?  
Can you feel me?  
Do you want to feel me?

Can you feel me?  
Can you feel me?  
Do you want to feel me, yeah

And when you're by yourself  
And there is no one else  
You remember how it feels  
To get it all off your chest

So get it all off your chest  
When you're all by yourself  
And there is no one else  
You remember how it feels  
To get it all off your chest

So get it all off your chest  
So get it all off your chest  
So get it all off your chest
