

# Primal Fear, Into The Future

Faster and faster, i march on my way  
For me there's no limit to see  
Harder and harder i push to succeed  
I live at the highest degree

Too many years i have wasted  
To live in the past  
I've started to move and i'm doing fast  
I'm riding into the future  
I'm out of hiding again ready to fly

Breaking through boundaries  
Destroy what confines  
A will that is made out of steel  
An immortal trust  
To What's right and what's wrong  
I warn you do not cross my wheel

To many years i have wasted  
To live in the past  
I've started to move and i'm doing it fast  
I'm riding into the future  
I'm out of hiding again ready to fly

Come with me  
I will show you the way  
To the place where's your destiny  
There's no reason to stay
