Prime STH, Beautiful Awakening

One more time
I tried to find
A way to kill the pain
But still it stayed the same
One more time
I pushed rewind
And instead to move ahead
I went back into my head

And drift away to the place
That I found under the ocean

Chorus:
Where the water pulls me down
Into a world without a sound
A beautiful awakening
And while the water soothes my mind
In this world that I have found
I'm sinking as I'm waiting
For the end

One more time
I couldn't find
A way to stop the pain
I tried, but it remained
So I drift away to the place
That I found under the ocean

Repeat Chorus

If you were here with me
And saw the things I see
The things I see in my head
I know you are just like me
We see things they'll never see
We live inside our own world
A world that they can't see
We're free
We're free

Repeat Chorus

For the end
