

# Prince, Strange But True

Okay, let me say this quick - before I start 2 cry  
U're the only one that I gave it 2, the one I fantasised 4  
And time away from U has taught me  
What I should have known  
That this hole I'm trying 2 fill with another - yeah, it's grown  
And I got your package  
But when I tried 2 write back I bailed  
See, trying 2 express the future, sometimes language fails  
And over this time I've learned  
My life force is increased by knowing U  
Every door that closes, another one opens  
Strange but true  
Strange but true

No regrets because I forget the unfamiliar faces  
Those petty lies and alibis, just golddiggas chasing  
Dreams of sovereignty, they tried to come between U and me  
A curse therein set forces a chain of events  
That only freed me when I remembered  
Where I was and who I am  
The only Prince that will ever rule this holy land  
All understand and all standunder this affirmation now  
By the power invested in me by God...  
All negativity bows  
Strange but true, let's see what U can do

U may have lost me, but I found myself  
The ones who love me without condition - this is my wealth  
And with these words I will win  
Repeat them over and over again  
All understand and all standunder this affirmation now  
By the power invested in me by God...  
All negativity bows  
All negativity bows  
All negativity bows

Strange but true, let's see what U can do  
Strange but true, let's see what U can do  
All negativity bows

(Strange but true)  
(Strange but true)  
Strange but true (true, true...)  
All negativity bows

(Strange but true, let's see what U can do)  
All negativity bows  
(All negativity bows)  
Strange but true  
Strange but true

(Strange but true)  
(Strange but true)  
Strange but true
