

Private Line, Last Night On Earth

Where do we go?
Do you believe in the place above
Where no one's on his own?
What do we need?
I just don't know
There are me and you and the empty space outgrown

Days like razors
Nights full of sore
When heaven and earth have closed their doors

I gave you everything
With you I spread my wings
This is the last, last night on earth
And I need you
Do you know how it feels to be lonely?
Do you know how it feels to be the only?
This is the last, last night on earth

Like a white fallen snow
Melt away with the pouring rain
It was too late to explain
The last straw of hope
Let's turn the page
That's all she wrote
It's so hard to go on through these days

I gave you everything
With you I spread my wings
This is the last, last night on earth
And I need you
Do you know how it feels to be lonely?
Do you know how it feels to be the only?
This is the last, last night on earth

And I need you
You gave me everything
For you I broke my wings
This is the last, last night on earth, yeah

Last night on earth
Last night on earth
