

# Pro-Pain, No Way Out

Douse the well with poison  
Call me when it's done  
Make sure there's no choice in all matters yet to come  
Follow me through darkness and trust my evil lead  
Bring death to those that shun us and swallow every seed

And over the fields we will run  
Blind to what we've become  
Face your fears and have no doubt  
There's one way in - and no way out

Venomous, courageous, carnivorous, and free  
Those that dare engage us get stripped of all their being  
Hate divides all nations in this genocidal age of gross annihilation and  
homicidal rage

So this is how wars are won?  
Millions are ruled by one  
Question all when in doubt  
There's one way in - and no way out

Open the wound and let the blood run until you're dry  
The system's immune  
Drain the will to survive
