

Professional Murder Music, Darker

I can't believe what I'm feeling now
After all that time I was far down
Their broken lives should show the way
far past anything they say
I can't resist anything you give
Every single part of the way you live
I don't know if this is so right
but I will never forget this night
I'll make this forever
and take you here with me
I'll make this forever
It's what I need
This is the end of what's always been
All the hate they bring doesn't mean a thing
When you're in this place standing here with me
Everything I need I can almost see
Why am I so alone
When there's so many around
Everyone now is not the same
as I slowly drift away
I'll make this forever
and take you here with me
I'll make this forever
It's what I need
