

Profugus Mortis, Upon The Raging Storm

Your body's filled with fire
Your heart is filled with ice
You never cared for others, so you will die alone
So you will die alone.

You're walking all alone
You're running now through midnight's cold
They all will follow you
will follow you until you die
(repeat)
Until you die.

Your body's filled with fire
Your heart is filled with ice
You never cared for others, so you will die alone

You're walking all alone
You're running now through midnight's cold
They all will follow you
will follow you until you die
(repeat)
Until you die.
