

Prong, Controller

Go ahead and rise above, see how far you get on top
Held down just to impair you
We know who's ahead of the game
You know who'll get the blame
You're in the grip of the controller

Do you really want it all back?
See how far you get on top
Held down just to impair you
It's the fear that you can't do right
See how you lose in your life
Cut down, they will impale you

Can you really get it on track?
You tried to make it all stop
Time will tell how much they denied you
You just got burnt by the controller
You just got burnt, they're gonna rule ya

You'll never know how to react
You're sucked to the very last drop
Time will tell what has been denied you
Are you clear in your mind and sight?
Are you clear right out of your head?
Just angry at the things that have failed you

So you wanna get it all back
You tried to make it all last
Tied down just to control you
You just got burnt by the controller
You just got burnt, they're gonna rule ya

Go ahead and rise above, see how far you get on top
Held down just to impair you
We know who's ahead of the game
You know who'll get the blame
You're in the grip of the controller

We know who's ahead of the game
You know who'll get the blame
You're in the grip of the controller
Controller

You just got burnt by the controller
You just got burnt
You just got burnt by the controller
You just got burnt

You just got burnt by the controller
You just got burnt
You just got burnt by the controller
You just got burnt
