

Prong, Out Of This Misery

I'll take no blame
For some other's mistake
A fossil of the past
Continue underrate

The ability to end a life
No stability in opinions not alike
Not alike
Opinions not alike

Someone should take me out of your misery
If I should take it any further
Any further, I'll end it (yeah)
Out of this misery
Out of this misery

I will not shame for a deed undone
I'm reaching for the stars,
Spittin' at the sun

I'll take the liberty
To get you off my back
I want your history
And taken off the map

Off the map
You're history, off the map

Someone should take me out of your misery
If I should take it any further
Any further, I'll end it (yeah)
Out of this misery
Out of this misery

You've got life
Blood on our hands
This is no life

Someone should take me out of your misery
If I should take it any further
Any further, I'll end it (yeah)

Someone should take me out of your misery
If I should take it any further
Any further, I'll end it (yeah)

Out of this misery
Out of this misery
Out of this misery
