

Psapp, In My Head

one step just behind me
one stretch is out of hand
some walk just beside me
some already dead
I fumble in time
keep walking just beside me
I want to watch the tread

you're always in my head
always in my head
always in my head

pace quickens now to breaking point
I sprint to cross and - hear me out
I'm running up and still I tip over
watch our fortune cross

you're always in my head
always in my head
always in my head

so step just behind me
you're stretching out of hand
we walked just beside and
we're already dead
I'm dancing in the limelight and still I tip over
watch our fortune roll

you're always in my head
always in my head
always in my head
