

Puffy AmiYumi, Planet Tokyo

the cd spins an we begin all systems go

come hitch a ride inside an watch the moon grow
it wont be long before were up in zero g
above the atmosphere just you and me and me

planet tokyo is a place not very far
in your stereo its as close as where you are
on the radio its a sound that you can see
planet tokyo is the place you want to be
tonight
right

your looking well but we can tell you need a fix
for something more than just another chick flick
a riff so strong that it belongs deep underground
a beat so sweet it makes you weep when we touch down

planet tokyo is a place not very far
in your stereo its as close as where you are
on the radio its a sound that you can see
planet tokyo is the place you want to be
tonight

planet tokyo is a place not very far
in your stereo its as close as where you are
on the radio its a sound that you can see
planet tokyo is the place you want to be
